STATE TABLES

STATE TABLES.

The State tables annexed present the usual summary of interesting facts.

Table "A" shows the population of Maryland by counties and the number of white and colored, according to the census of 1900.

Table "B" shows the population between five and twenty and the quarterly distribution of the State school tax to the white schools of the several counties and the City of Baltimore.

Table "C" shows the colored population between five and twenty, and the quarterly distribution of the State school tax to colored schools of the several counties and the City of Baltimore.

Table "D" shows the assessed value of the property subject to taxation in the several counties, with the amounts, as "State School Tax," "Free School Fund," "Academic Fund," "Appropriation to Colored Schools," and the "County School Tax."

Table "E" shows receipts from all sources, with the totals (including balances carried over).

Table "F" shows the expenditures of the several counties under the items of teachers' salaries, incidental expenses, books and stationery, building, repairing and furniture, supervision and office expenses, miscellaneous, interest, indebtedness paid, with the balance on hand and totals.

Table "G" shows the number of pupils in the primary grades, and the number studying special branches.

Table "H" shows the number of schools in each county, the number of months schools were open, the number of teachers, male and female, the number of different pupils, the average number of pupils enrolled and in attendance, and the highest number enrolled in one term.

Table "I" shows the cost of the colored schools and the statistics (under the same heads as those mentioned in Table "H") of the colored schools separately.

Table "K" shows the receipts from all sources for colored schools (including balance carried over).

Table "L" shows the expenditures for colored schools under the heads mentioned in Table "F."

Table "M" gives the statistics of the several colleges receiving State donations and of the State Normal School.

Table "N" gives the statistics of the several schools and academies receiving State donations.

The county reports give in detail the enrollment and the average attendance for each term, and the expenses of each individual school, under the heads of rent, fuel, repairs, incidentals, furniture, blackboards and stoves, books, and teachers' salaries. Every citizen can thus know what the school in his district has cost, and may become the auditor of the accounts. It is believed that no State in the Union furnishes a similarly minute detail of expenses.

REPORT OF THE SECRETARY.

REPORT OF THE SECRETARY.

The summary included in the report of the State Board of Education, and the State tables immediately following, give a comprehensive view of the condition of the public schools during the last school year ending July 31, 1903. The statistical reports of the Board of Commissioners of Public Schools of Baltimore City, and the School Commissioners of the several counties of the State, present, in minute detail, the facts concerning the schools, and show the receipts and disbursements for their support.

ARBOR AND HIGHWAY DAY.

Arbor and Highway Day was observed by all the public schools of the State on the 3d day of April, 1903, in pursuance of the following proclamation by His Excellency, the Governor.

EXECUTIVE DEPARTMENT, ANNAPOLIS, MARYLAND.

PROCLAMATION.

To the People of Maryland:

WHEREAS, By joint resolution, No. 15, passed by the General Assembly of Maryland at the January Session of 1884, the Governor is authorized and directed to issue annually a proclamation, designating a day in April for the planting of trees, to be known as "Arbor and Highway Day;" and

WHEREAS, It has been suggested to me that it would be appropriate, at this time, to call the attention to the necessity for the care and preservation of the birds of our fields and forests;

NOW, THEREFORE, I, JOHN WALTER SMITH, Governor of the State of Maryland, do hereby designate Friday, the 3d day of April, 1903, as "Arbor and Highway Day," and I do recommend that the day be devoted by the people of this State to the planting of trees, and I especially recommend to parents and teachers in our schools that they encourage their children, or those under their influence, to plant and transplant at least one forest shade tree on that day by the side of a public road or about their school house, and that they be urged to study the habits and needs of our birds and their young with a view to their preservation and increase.

It is hoped by the observation of this custom to counteract the evil effects resulting from the rapid destruction of forests and birds in our State, and to maintain a due proportion of forest land, which is essential to the comfort, health and convenience of every country.

THE GREAT SEAL OF MARYLAND.

Given under my hand and the Great Seal of Maryland.

Done at the City of Annapolis, on the 18th day of March, in the year of our Lord nineteen hundred and three.

By the Governor:

JOHN WALTER SMITH, *Governor.*

WILFRED BATEMAN, *Secretary of State.*

The following was the Arbor Day program at the Maryland State Normal School:

Only a little shrivelled seed,
It might be flower, or grass or weed;
Only a box of earth on the edge
Of a narrow, dusty window-ledge;
Only a few scant summer showers;
Only a few clear shining hours;
That was all. Yet God could make
Out of these, for a sick child's sake,
A blossom-wonder, as fair and sweet
As ever broke at an angel's feet.

COURSE OF INSTRUCTION IN THE STATE NORMAL SCHOOL.

The course of instruction extends through three years. Candidates for admission may enter the second year (Middle) class, on passing an examination of the studies of the first (Junior) year, and the third year (Senior) class on passing an examination of the studies of the second (Middle) year.

Observation of actual teaching in both Normal and Model Schools, with notes and written reports thereon, is required of every class.

SINGING AND DRAWING are taught in every term except the last, also Sewing (to women) and the Use of Woodworking Tools (to men.)

LATIN has been made an *elective* study, and students who upon entrance elect to take Latin must continue its study during the entire course.

GENERAL PLAN OF THE COURSES.

SCIENCE AND THE ART OF TEACHING.

(*a*) *Psychology:* The "Elements of Psychology" by Comparé is the text-book used, and class lectures are given suggesting the application of the principles therein stated in actual teaching. The principal standard writers upon the subject

have been consulted, and attention is called to an excellent collection of the best authors upon the subject in the school library.

(*b*) *Pedagogy:* Lessons in Pedagogy extend through the three years and are arranged thus:

Junior Year: Compayre's "History of Pedagogy" is read and its several subjects discussed. The life-period of a nation, its civilization, progress, laws, customs, are compared with its means and limitations in educating its people and the value attached by it to education. Inspiration is gained through studying the life of the earnest and successful teacher, while a knowledge of the principles underlying his teaching is taught.

Middle Year: Theory and practice are combined in lessons for primary classes; principles underlying all true teaching are emphasized; means of securing the attention of the pupils and the power to keep them busy are dwelt upon; special attention to the dispositions, the habits of children that come under the student's own observation is advised; the making of schedules in conformity with the requirements of the several grades is practiced.

Senior Year: Instruction in this year embraces a knowledge of the laws governing physical, moral and mental growth; effect of environment; discipline; practice lessons in elementary studies; criticisms upon the same; the encouragement of individual method rather than imitation; the art of questioning so as to stimulate and secure the end sought for; æsthetics in the school room.

In all recitations the student is required to obtain not only a thorough knowledge of the subject-matter for herself, but how to teach that subject to another, adapting her presentation to the special requirements of the individual mind.

Students of all classes are required each year to observe in the Model School where they see illustrated principles and methods taught them in the Normal department. They are taught to trace here effect back to cause, to note the processes of the development of the subject in the minds of the several children, and to form their own laws for the same; to study closely the relationship existing between pupil and teacher, the influence of the teacher upon the mind and habits of the pupil, and the cause of this influence. The students report upon their observations, inferences, etc., in a conference held weekly, conducted by the teacher in charge of this department.

(*d*) *School Law:* The text of the School Laws of the State, and of the By-Laws, Rules and Regulations of the Public School of the State are studied, and their application in Baltimore City and in the counties.

History and Civics.

(*a*) *History:* The course in History is limited to the 16th, 17th, 18th and 19th centuries in England, France, Germany, the United States and to such Spanish and Italian history as is incidental. One period daily in the Junior Year, from January to May, is given to this study. Students have no text-books. Teaching is done by lecture. A question box, pictures, maps and charts are used as helps. Outside work required varies from year to year, as does the method of taking up the work. Some years students are required to copy and illustrate by maps and pictures their notes on the lectures; in others principal events in each country are written in parallel columns, pictures and maps being arranged at the end of each century; in others students answer in writing once a week one review question, and hand in one theme on a subject assigned, with a scrap-book containing bits of history, pictures, etc.; in still others four themes are required, one on a subject from each century.

As to the order of taking up the history some years' events are taken contemporaneously in the four centuries; in other years each country is considered separately. The greatest emphasis is always laid on a sequence of events; great movements, the evolution from class rights to those of the individual, from feudalism to self-government.

(*b*) *Constitution of the United States:* The germs of the written Constitution in history; its antecedents in England, especially the "Magna Charta" and the "Bill of Rights;" the proposal by Franklin of a union of the British Colonies in America; the adoption of the "Articles of Confederation;" the Constitutional Convention of 1797, and the ratification of the Constitution are discussed in class lectures. The text of the Constitution and of its amendments, and the application thereof in the government of the United States are then studied.

(*c*) *Constitution of Maryland:* The establishment and development of the government of Maryland is taught by class lectures, of which notes are made by the students. In the preparation of the lectures all the standard histories of the Colony and of the State have been consulted, especially those of Dr. William Hand Browne, Col. J. Thomas Scharf; the publications of the Maryland Historical Society and of the

Johns Hopkins University. A careful study has also been made of original documents, viz.: The instructions of Cecilius Calvert to Leonard Calvert previous to the sailing of "The Ark" and "The Dove;" the Charter of Maryland; each of the Constitutions of the State, and the amendments adopted.

The text of the present Constitution and its application in the government of the State is then studied.

Work in English.

(*a*) *English and Composition:* English has two periods a week in the first half of the Junior Year. Usually the lessons are not assigned, but the students are drilled in the use of such words as are commonly used incorrectly. This is done by original sentences, given by pupils, containing the word or by mimeographed sentences with blanks to be filled.

Students are required to give oral descriptions of persons, places, etc., and to reproduce stories. Spelling lessons, including the analysis of words, the writing of diacritical marks and the sounds of letters, are given.

The work in English composition consists of: (1) Written and Oral Observations. (2) Daily Themes—through which are taught Punctuation, Capitalization, Words, Sentences, Paragraphs. (3) Fortnightly Themes—Descriptive, Narrative, etc. (4) Written Review of such Books as "Ramona," "The Last of the Mohicans," "The House of Seven Gables," "My Lady Rotha," "When Knighthood Was in Flower," "To Have and to Hold," etc. (5) Letter Writing—Business Letters, Social Notes, Friendly Letters.

English Grammar: The work during the Junior Year consists of a thorough study of the different parts of speech, syntax, analysis, parsing.

During the Middle Year the work includes a review of the study of the inflexions; more difficult syntax or construction, and more advanced analysis and parsing.

Pupils receive their instruction in the above courses mainly from the teacher.

Lockwood's "Lessons in English" is put into the hands of every pupil, and the texts of Meiklejohn, Maxwell, etc., are used for reference.

In the Senior Year grammar includes the analysis of difficult constructions, examples of case, mood and tense forms, the grammatical and historical relation of words to one another, the changed meaning of words, their derivation,

synonyms, correction of false syntax, paragraphs, punctuation, versification, figures of speech, composition, distinctness of style. As facility of expression is best acquired through expression, much practice in composition is given not only in this but in other studies.

In English, Meiklejohn's "English Language" is closely adhered to as the text-book. Collateral matter is also taken from Fowler's "Large Grammar," Lounsbury's "English Language," Whitney's "Language" and the "Study of Language," and Morris' "English Accidence."

(*c*) *History of the English Language:* Language in general is touched upon, as well as the family of languages, and the group to which English belongs. The history of our language is carefully and fully traced from its dialectic form in the lowlands of Germany to its present composite condition.

(*d*) *Literature:* (Junior Year.) American Literature. (1) The following selection from American authors are read in class:—Irving's "Sketch Book," Hawthorne's " Tales of the White Hills," Longfellow's "Evangeline," "The Courtship of Miles Standish," and some of his shorter poems, Lowell's "The Vision of Sir Launfal" and Bryant's "Thanatopsis."

The following suggests the character of the home reading done during the year: Hawthorne's "The House of the Seven Gables," "Tanglewood Tales" and "Wonder Book," Irving's "Tales of a Traveller" or "Alhambra," Cooper's "Last of the Mohicans," Longfellow's "Hiawatha" and Whittier's "Snowbound."

(2) Study based on the reading—Figures of speech, making of outlines, use and kind of words, sentences and paragraphs, comparison of prose and poetry, study of versification —verse, stanza, meter, foot, rhyme, rhythm, etc., word pictures, inductive study of the characteristics of the author with proofs by quotations from the text.

(3) Suggestive topics assigned for oral recitations and for essays.

(4) Quotations memorized from all selections read in class, and illustrated note-books carefully prepared.

(5) Life of every author and critical library references studied after the careful study of the text.

(6) History of American Literature,—Outline of history in three periods, with sub-divisions and chief writers memorized. Lectures on amount and kinds of writing at different periods with causes, tendencies and comparison of writers. Use of class charts and outlines.

(7) Celebration of birthdays of American authors. Large calendar kept with picture of author placed on the date of his birthday; talks and quotations prepared voluntary by pupils.

(Middle Year). English Literature. (1) The following selections are read in class: Shakespeare's "Merchant of Venice," "Julius Cæsar," Pope's "Translation of Homer's Iliad," Addison's "Sir Roger de Coverley Papers;" read at home: Shakespeare's "Macbeth" and "As You Like It," Carlyle's "Essay on Burns," Scott's "Ivanhoe" or "Kenilworth," Eliot's "Silas Marner," and Goldsmith's "Vicar of Wakefield."

(2) Study based on reading—Drama; plot—outlining by scenes, statement of theme, comparative importance in every act, climax, catastrophe, etc.; characters—inductive study reference, quotations and comparisons; search questions assigned, answered and discussed. Comparison of novel and drama; outlining of essays; study of poetical forms; figures of speech, etc.

(3) Suggestive topics and essays.

(4) Quotations and note-books.

(5) Lives of authors and library references, after class study of their works.

(6) History of English Literature. Outline of history in eight periods with chief authors memorized. Study of rulers in England and chief events of history of every period and their effect on literature. Lectures and chart drills on tendencies of periods to poetry or prose, with causes, comparisons of periods and writers. Various summaries and outlines. Especial attention is given to periods from the sixteenth century to the present time.

(7) Celebration of the birthday of English authors.

(Senior Year.) English Literature. (1) Selections read in class—Milton's "Paradise Lost," (books I and II) or minor poems; read at home—Macaulay's "Essays on Addison," or "Essay on Milton," Tennyson's shorter poems, Wordsworth's shorter poems.

(2) A study of outlines, figures of speech, comparisons, characteristics, quotations, note-books.

(3) Especial study of the life of Milton and the effect of seventeeth century history upon his writing and upon literature in general. Library references.

(4) History of Literature—continued review and drill on periods. Especial study of history from the beginning of literature to the sixteenth century.

(5) Pedagogical study about five weeks. Outlines of reading adapted to primary and grammar school grades given and discussed.

A list of memory selections suitable for primary and grammar grades is given.

Illustrative presentations of selections for various grades are given by the teacher, especially in the poems of Wordsworth, Tennyson and Stevenson.

Preparation by every pupil of such presentations, and practice teaching given by many.

Various practical plans especially adapted to country schools are discussed.

Mounting of pictures for the school-room is required from every pupil in the form of a chart, panel or calendar.

(*e*) *Elocution:* We introduce the subject of Elocution by giving brief talks on the ultimate aim of all education; helps to character building; the relation Elocution holds to other studies; the benefits to be derived from the study of Elocution by the pupil personally and by the pupil as a teacher.

Summary of Work.

A. True Conception of Elocution.

1. Study.
2. Nature.
3. Man.
4. Fine Arts.

(*a*) Qualities common to all good art: Truth, simplicity, unity, purity, directness, suggestiveness, repose, harmony, variety.

B. Impression.

1. Mind and Soul or Physic Training.

(*a*) Development of character and cultivation of taste. Note: Of course, actual class training on these points is not possible; but we give suggestive talks.

(*b*) Cultivation of those faculties of the mind by which the correct impression is received. Attention, concentration, imagination, logical faculty, sympathy. Note: This is where most of the work is done.

C. Expression.

1. Physical Training.

(*a*) Good air, good food, cleanliness.

(*b*) Correct dress.

(*c*) Physical exercise.

I. Out-door.

II. In-door. Practical work in the Gymnasium.

2. Vocal Training.

(*a*) Vocal exercise. Note: The voice may be trained from two standpoints, the *mechanical and artistic*. In the *mechanical method* the proper use of the respiratory muscles and vocal organs is reached through technical exercises as suggested by the summary. In the *artistic method* the voice is trained to respond to the mind and feelings.

Lyrics, which the pupils can appreciate and enjoy, and which express some joyous emotion, as joy in nature or love of country, are best in developing tone-color. Later comes the practice of other emotions.

Correct breathing, relaxed throat, control of breath, forward placing of tone, articulation.

(*b*) Vocal music under supervision of musical instructor.

(Junior Year.) On entering school each pupil is examined with regard to breathing, use of the voice and expression in reading. We strive to have the pupils get a true conception of what good reading is, and also to master a few of the simple steps in expression. In examination the pupil reads a paragraph from a newspaper and recites a narrative poem. We read in class Whittier's "Child Life in Prose," "Child Life in Poetry," and other poems of a similar character.

(Middle Year.) The development of the pupil's power of expression was of the first consideration in the Junior Year. Now we have the difficult task of preparing the pupil to teach others. We enlarge upon the work of the first year, and in addition discuss simple ways of attaining desired results with pupils. We read selections from the Longfellow "Leaflets" and "Snow Bound." Each pupil tells a short story and recites a lyric.

(Senior Year.) We review and enlarge further on the various points taken up the preceding years. We consider problems in connection with teaching reading. The class is divided into sections, and one section has the opportunity on certain days of spending the lesson period consulting books on special points. This has been found very helpful, as we have the beginning of a fine library of reference books on reading.

We read Shakespeare's "As You Like It" or "A Merchant of Venice."

At the beginning of the term, scenes from Shakespeare are given, from which each pupil chooses one to prepare for the end of the term.

In the Junior and Middle Classes, we have a few simple talks on Art, using as examples, the copies of famous pictures and statues found in our own school building. The pupils illustrate their own art notes with Perry pictures.

In the Senior Class we talk of the Arts of Barbizon and see their original work at the Walters' Art Gallery.

Mathematics.

(*a*) *Arithmetic:* Arithmetic in the Junior Year from September to December inclusive, one period daily, includes percentage, commission, and brokerage, gain and loss, simple interest and the metric system, with analysis of problems. Students have Appleton's "Numbers Applied" as a reference book, but the actual work is dictated. Examples are written and solved on the board by students, who then explain them to the class. Especial attention is called to accuracy in statements made on the board, and also to neatness of work and written explanations. One day in each week the work is handed in on paper, and the lesson period is occupied in having pupils at the board solve examples not previously given, in order to get as much individual work and work done under the eye of the teacher as possible. A note-book is kept in which typical examples and notes are written for reference. In taking up new subjects, the inductive method is used and a rule formulated from examples worked. Subjects are grouped so as to make as far as possible a natural progression. This work is continued in the Middle Year from January to May. In both years the work is practical, and constant appeal is made to reason and not to rule. Arithmetic is completed in the Middle Year.

(*b*) *Algebra:* (Junior Year.) In this course, addition, subtraction, multiplication, division, factoring, highest common

factor and least common multiple, fractions, and simple equations are taught. Students have no text-book. The Lecture Method is used, and students are required to formulate original questions. A test is given about every two weeks and these papers are corrected by the teacher and returned to students. Text-books referred to are Wentworth's, and Fisher & Schwatt's.

(Middle Year.) This course comprises a careful study of simple equations, involution, evolution, theory of exponents, inequalities, radicals, imaginaries and quadratics.

Special attention is given to formulating original examples.

Text-book recommended—Fisher & Schwatt's Algebra, Wentworth's "New School Algebra."

(*c*) *Geometry:* (Junior Year.) Two lessons a week are given in geometry during the Junior Year. Students have no text-book. They are required to demonstrate theorems at the board to the class, or to write them in review. As far as possible the students give all explanations, and the inductive method is used.

(Middle Year.) Amount covered—Six books of Phillips and Fisher's abridged edition, with many of the original exercises and problems.

In the Senior Class the work is pursued more rapidly. The pupil knowing how to use a text-book is allowed one, and is required—first, to demonstrate the proposition; second, to answer satisfactorily all questions asked by the teacher or class; third, to teach the same to the class.

It is required that the figures be large and neatly drawn, that all lettering be easily seen by every member of the class, that scientific and exact language be used, that the sequence of steps in the proof be logical, and that there be no unnecessary verbiage.

(*d*) *Book-keeping:* The course in book-keeping is similar to, but not so extensive as that outlined by the Sadler-Rowe Company in their "Commercial and Industrial Book-keeping." The lessons are not intended to produce specialists, this being the work of the Business College. The aim is rather to familiarize the pupils with the principles underlying journalizing and posting, with the necessary contents of business papers, and to give them a fair amount of practice work in these subjects. Neatness, accuracy, promptness in recording, and careful attention to details are insisted upon.

Physical and Natural Science.

(*a*) *Physiology:* The course in Physiology is completed in the first half of the Junior Year. It consists of lectures, illustrated by charts, models, and drawings, and of quizzes on reading assigned. The text-book in the hands of the students is Martin's "Human Body." Students must be able to draw accurately and readily different parts of the body, and to explain the changes which the food undergoes in digestion and the blood in respiration, the direction of nerve currents, etc.

(*b*) *Chemistry:* It is the purpose of this course to call the attention of the student to the phenomena of change that is constantly occurring in the world about them, and to give them the key whereby they can unlock and understand many of the processes and changes of every-day life.

The course is given by lectures, illustrated by carefully performed experiments. These the pupil must carefully follow and record their observations and inferences in their note-books.

The following is a synopsis of the work of last year: Chemical and physical change; elements and compounds; mechanical mixtures; Law of Definite Proportions; atoms; molecules; symbols and formulas; chemical affinity; valence; manifestation of chemical action; aids to chemical action; chemical reaction; methods of separation.

A study of some of the common elements and their compounds—oxygen; hydrogen; water; nitrogen; ammonia; the oxides of nitrogen; nitric acid; acids, bases and salts; the halogen acids and salts; carbon; marsh gas; olefiant gas; acetylene gas; coal and water gas; carbon mon-oxide; carbon di-oxide; sulphur; hydrogen sulphide; sulphur di-oxide; sulphuric acid; the atmosphere and its relation to life; flame; oxidation and reduction; chemical nomenclature; problems based on the Laws of Definite Proportions.

(*c*) *Physics:* The course in Physics occupies one year. Special attention is given to the construction and use of simple and inexpensive apparatus.

The class work includes the subjects of Air, Liquids, Heat, Magnetism and Electricity. From fifty to seventy-five experiments are performed by each student, permanent reports of each experiment being made. The objects of the experiments are to verify, not to discover, laws; to develop care and skill in manipulation and accuracy of observation.

Gage's "Physics" form the basis of the work.

Hammel's "Observation Blanks in Physics" is used for laboratory work.

(*d*) *Mineralogy:* A laboratory study, elective with Latin. The pupils become familiar with the characteristics of and the terms applied to minerals by handling and studying type specimens. The student determines and studies the characteristics of some thirty-five common minerals of economic importance. Their uses and the reasons why they are used are emphasized.

A study of the more useful industries connected with certain minerals, *e. g.*, mining of coal, the manufacture of coal, gas, lead pencils, salt, lime, the smelting of iron ores, etc., is carried along with the work. Austin's "Observation Blanks in Mineralogy" is the laboratory manual used by the students.

(*e*) *Physical Geography:* Text-books used—Davis' "Physical Geography," Gilbert and Brigham's "Introduction to Physical Geography." The text is supplemented with lectures, illustrated with stereopticon, maps, globes and sand table.

The storms of the "prevailing westerlies," weather-maps, forecasting; the inorganic agencies now at work upon the earth, their influence upon its structure and present surface appearance; the formation of soil; a general study of the surrounding region of the State; the kinds of rocks found, their origin and mode of formation receive special attention.

Field excursions for the study of the excellent local physiographic conditions are made as frequently as possible.

(*f*) *Geography:* This course extends through the first half of the Middle Year. The following outlines the course as taught, etc.:

> (1)—Home Geography—Taught by a series of elementary lessons given by the students under the direction of the teacher, by means of Nature pictures, and sand table; (2) North America—as a typical continent; (3) The United States; (4) Maryland; (5) Europe and Asia—a brief study, mainly by comparison with North America.
>
> (6)—Map Drawing—A small part of each lesson is given to rapid drawing of Outline Maps of the continents, showing the natural features which influence the distribution of climate, plants and animals.
>
> (7) Putty and Paste Maps, made by the students.

Tarr and McMurray's "North America" and "Europe and Asia;" Frye's, Redway's and Hinman's texts on the geography of Maryland form the basis of the work for this course.

(*g*) *Botany:* Taught in part by the laboratory method; in part by the lecture method. The aim of the work is to know the plant as a complete organism, living its own life in its own way. Hence life, function and adaptation is made primary, mere structure, secondary.

The following outlines the work: Seeds and germination; the organs of the plant—roof, steam, leaves, hairs, buds; inflorescence; typical exogens and endogens; fruits; a few types of flowerless plants.

Field work for the purpose of instructing pupils how to collect, analyze, prepare and mount specimens, and to observe and study plants in their homes is done.

Each pupil is assigned a special topic for study and observation in the field, the work to be illustrated by the actual specimens observed, whenever practicable. The character of this work is indicated by such topics as these:

(1) How seeds travel. (2) How plants protect themselves. (3) Conditions requisite for germination. (4) Leaf veining. (5) Leaf shapes. (6) The history of the apple tree branch, as told by itself, interpreted by the pupil. (7) Development of a blackberry from flower to fruit. (8) Development study of the germination of beans, corn or peas. (9) How a pumpkin plantlet rids itself of its shell, and some one hundred other topics covering the entire field of botany.

Bailey's "Botany" is the basis of the work for this course.

(*b*) *Zoology:* The course in Zoology occupies sixteen weeks—three forty-minute periods a week in the Senior Class —for those not taking Latin.

A study of type forms is made in the laboratory, and a notebook with drawings and descriptions must be kept throughout the course. The method of study varies with the different animals. In most cases the living organisms is studied, stress being laid on its activities and relation to environment. Field work is required. The compound microscope is used throughout the course. Library references in such form studies are substituted for text book. The Agassiz Association consists of members of the Zoology Class and meets every week after school for special work in this department.

Other Subjects.

(*a*) *Latin:* (Junior Year). Chapters I-XXIX, inclusive, of Tuell and Fowler's "A First Book in Latin" forms the basis of the work for this year.

Forms learned—five declensions of nouns, three declensions of adjectives, two conjugations of the indicative mood, comparison of adjectives and adverbs.

Construction learned—two uses of the nominative case, two genitive, three of the dative, two of the accusative, the vocative, and twelve of the ablative; the adjective agreement, verb agreement, and the use of prepositions.

Class work—memorizing of vocabularies, thorough drill on forms and constructions by blackboard and oral recitation, almost daily written translations of English sentences in Latin in the exercise books. These sentences are corrected by the teacher, returned and rewritten. All rules of syntax violated are written in full with the corrected sentences. Tests are given every month.

(Middle Year.) Tuell and Fowler's "A First Book in Latin" is completed. Forms and constructions sufficient for the reading of Cæsar are learned. The other work of this year is a continuation of the Junior Year work.

(Senior Year.) Greenough, D'ooge and Daniell's "Second Year Latin" is the text used.

The amount read varies; it will eventually be the equivalent of three books of Cæsar.

The study of constructions, especially of subjunctive infinitive, and indirect discourse is continued.

Latin Prose—average one exercise a week—the sentences being based on the text selected from Daniell's "Latin Prose" and others.

Virgil—A few advanced pupils are given extra work in translating and scanning a part of the first book of Virgil.

(*b*) *Physical Training:*

SWEDISH SYSTEM.

A. Practical Work—

Free standing exercises and apparatus work in Gymnasium.

B. Theory—

1. Lectures:

(*a*) Theory of Swedish System

(*b*) Comparison of Swedish with other Systems.

2. Study:

(*a*) Baron Posse's "Hand Book."

Essays are prepared in the Senior Class on such subjects as Physical Training in the Country Schools; Physical Training in Primary School; Habitual Posture of School Children; Plays, Games, etc., for Physical Development, etc.

(*c*) *Drawing:* (1) Form Study—outline drawing from type solids and familiar objects leased on type solids, clay modeling; (2) Light and Shade—drawing in charcoal from still life; (3) Composition—practice with different media (lead pencil, brush work, crayon, etc.); (4) Color study with water colors.

Consideration is also given to historic styles of architecture and ornament, plant form and its adaptation in decoration, and to outdoor sketching.

(*d*) *Music:* Elementary theory; the writing of musical exercises; drill from the music chart; thorough training in chorus singing.

(*e*) *Manual Training:* The aim of the Manual Training course is to make the pupil systematic and thorough in his work, to train his judgment and executive faculty and to better fit him to meet the practical side of life.

In the Middle and Senior Years especial attention is given to the teaching of methods employed in directing the teaching of Manual Training in the schools of the State.

Junior Year—Paper Folding and Cardboard Construction—15 models in Paper Folding, 20 models in Cardboard Construction.

Middle Year—An Elementary Course in Knife Work.

Senior Year—An Advanced Course in Knife Work; also advanced work in Sloyd, using various wood-working tools.

(*f*) *Sewing*—In this course the ladies are taught how to hem, patch, darn, work button-holes, etc., how to draft, cut and make undergarments; how to take measure, draft the patterns, cut, fit and make dresses.

ANNOUNCEMENT.

The Thirty-seventh Annual Report of the State Board of Education, showing the condition of the Public Schools of Maryland, for the year ending July 31, 1903, was prepared and printed, and was in the bindery, ready for distribution, when it was totally destroyed by the great fire in Baltimore, February 7 and 8, 1904.

The copy for said Report was also totally destroyed by the same fire, in the office of the Public Printer.

Whereupon the State Board of Education directed that the said Report should be again prepared and republished.

The Secretary has, as soon as possible, collected the necessary material for all the statistical part of the Report.

The Reports of the Maryland "State Teachers' Association" and of the "Association of School Commissioners and Examiners" are included in the Report of the State Superintendent of Education, and are, therefore, omitted from this Report.

CAROLINE COUNTY.

DENTON, MD., October 3, 1903.

HON. E. B. PRETTYMAN,

Secretary State Board of Education, Baltimore, Md.

DEAR SIR: Herewith I submit the statistical report of the condition of the Public Schools of Caroline county for the year ending July 31, 1903. It is gratifying to know that in several respects advancement has been made. The enrollment is larger and the average attendance higher, and the item of teachers' salaries shows an increase of more than six per cent. over the previous year.

Very respectfully,

W. S. CROUSE, *Secretary.*

CHARLES COUNTY.

LaPlata, Md., September 30, 1903.

Prof. E. B. Prettyman,

Secretary State Board of Education, Baltimore, Md.

Dear Sir: I herewith respectfully submit the annual report of the public schools of Charles county for the year ending July 31, 1903.

You will observe that the colored schools of this county depend for their maintenance almost entirely upon the State appropriation. There is only 2 per cent. of the county tax levied for school purposes apportioned to our colored schools, and the oyster license; our only other source of revenue is small. The recent change in the State appropriation to the colored schools of Charles county reduces the State apportionment to this county about 65 per cent. As this reduction was unexpected our colored schools, although we closed the 15th of May, are now $300 in debt. Besides this, we will be unable to open them until about the middle of the coming winter.

The number of official visits of the Examiner was somewhat curtailed, owing to the unexpected early closure of the colored schools of the county. Respectfully,

M. R. Stone,

Secretary Treasurer and Examiner

HARFORD COUNTY.

OFFICE BOARD OF SCHOOL COMMISSIONERS
OF HARFORD COUNTY.
BELAIR, MD., September 15, 1903.

DR. E. B. PRETTYMAN,
Secretary State Board of Education.

MY DEAR SIR: In submitting to you the report of the schools of Harford county for the scholastic year of 1902-3 and the fiscal year ending July 31, 1903, I beg leave to add that the scholastic condition of the entire system shows a very encouraging degree of progress. The standard of scholarship among our teachers has constantly advanced, and the professional standing has shown a corresponding improvement. Teaching is now generally recognized as a learned and honorable profession, and the teacher wields in the community an influence for scholarship, morality and general intelligence, second to none. The great majority of our instructors are endeavoring to meet the reasonable requirements of advanced methods and appliances, and are alert to discover and utilize the best.

In addition to the normal training of a large proportion of the teaching body, the standard has been raised and maintained by a rigid system of examinations and by special professional training through Teachers' Institutes, which, in our county, have been held without exception for the past sixteen years, each annual session continuing through a period of five days. A thoroughly graded course of study, extending annually through a scholastic period of ten months, has been uninterruptedly maintained in Harford for the past twenty-three years. This course has been instrumental in diffusing among our people a general intelligence far above the average, and its manifest results have convinced the most skeptical of the great value, if not the absolute necessity and indispensability of the public schools.

Notwithstanding these encouraging features of our work, there remain many things to be accomplished. Lack of funds for building purposes has compelled our Board to exercise extreme economy in this direction, resulting in the urgent need of a number of well-equipped houses. What our schools most need is legislation providing for substantial aid from the State in the payment of teachers' salaries. Such assistance would enable us to increase the average remuneration of teachers, and at the same time allow us to divert a larger part of the county appropriations to general equipment in the shape of buildings and accessories. To stint the teachers invariably results in driving the best to more lucrative fields of labor, or to other professions, thus lowering the standard of professional scholarship skill and effectiveness.

The idea of consolidation of small rural schools into larger central ones, with better facilities and more thorough classification, is taking shape among our people, but lack of funds may prevent our school authorities from putting into execution their own advanced views upon this subject.

We have no wish to reflect upon those whose duty it is to levy and appropriate the funds for the support and maintenance of our schools. Our Boards of County Commissioners have shown in this matter a most intelligent liberality, and have never failed to respond in the most substantial manner to the requests of our Boards of School Commissioners. No other interest of a public character stands closer to our people, and they have never failed to meet all educational needs with a cheerfulness most praiseworthy.

Owing to the extraordinary prevalence of contagious diseases and the peculiar condition as to fuel, our schools have not for the past year shown their usual average attendance. We believe, however, that the return of normal conditions will bring a considerable increase in these statistics.

Very respectfully submitted,

CHAS. T. WRIGHT,

Secretary, Treasurer and Examiner for School Board of Harford County.
